

HEMANTH M

hemantham015@gmail.com | +91 6362659789 | github.com/AnuragHemanth | linkedin.com/in/anurag-hemanth9945

PROFESSIONAL SUMMARY

Detail-oriented fresher with hands-on experience in full-stack development and a strong foundation in software testing methodologies. Experienced in designing and executing test cases, identifying defects, and validating REST APIs using Postman. Proficient in SDLC, STLC, and Agile workflows with practical project exposure to system validation, debugging, and quality assurance. Seeking to leverage technical skills and QA knowledge as a Trainee at Wipro to ensure 100% quality compliance in software products.

TECHNICAL SKILLS

Testing Skills: Manual Testing, Test Case Design, Test Planning, Defect Reporting, UAT, SDLC/STLC, Regression Testing

Test Tools: Postman (API Testing), Git/GitHub (Version Control), Linux

Automation Knowledge: VB Macros (basic), Selenium concepts, Python scripting for test data pipelines

Languages: Java, JavaScript (ES6+), Python, SQL

Databases: MongoDB, MySQL — schema design, query optimization

Frameworks: Node.js, Express.js, React.js, REST API

Methodologies: Agile/Scrum, Microservice architecture concepts, OOP, Design Patterns

EXPERIENCE

AIML Intern & Web Developer Intern

Feb 2026 – May 2026

Spherenex

- Performed functional and integration testing of full-stack web application features built on MERN stack, ensuring API response correctness and UI accuracy
- Designed and executed manual test cases for RESTful APIs connecting frontend to backend ML models; identified and tracked defects through resolution
- Automated data preprocessing pipelines using Python scripts, reducing manual testing effort for repetitive data validation tasks
- Collaborated cross-functionally in Agile sprints, delivering production-ready features with zero post-deployment critical defects

PROJECTS

Wanderlust Web Application — QA & Testing Focus | *React.js, Node.js, Express.js, MongoDB, REST API*

- Authored comprehensive test cases covering CRUD operations, JWT authentication flows, and role-based authorization scenarios
- Validated MongoDB schema integrity and relational data models through structured test scenarios and edge case coverage
- Executed functional and security testing of OAuth2-style auth flows and session management, documenting defect reports with clear replication steps
- Performed cross-browser UI testing of responsive React components, ensuring consistent behavior across viewports; tracked test progress and reported results to stakeholders

Speech-to-Speech Translation System — Pipeline Validation | *Python, Deep Learning*

- Designed a modular, service-oriented test strategy across ASR, Translation, and TTS components, validating each stage independently and end-to-end

- Measured inter-service latency and accuracy metrics, producing test status dashboards for each testing cycle and documenting root cause analysis for errors

LSTM Stock Price Prediction — Model Quality Assurance | *TensorFlow, Keras, Python*

- Validated end-to-end ML pipeline quality through data preprocessing checks, feature engineering tests, and performance evaluation benchmarks
- Reported model accuracy deviations with statistical root cause analysis, ensuring forecasting reliability within defined SLA parameters

EDUCATION

B.E. Information Science Engineering

2022 – 2026

MIT Mysore | CGPA: 8.44 / 10

Pre-University

2020 – 2022

Christ The King | 86%

ACHIEVEMENTS & ADDITIONAL INFORMATION

- 2nd Place — HackFusion 1.0 Hackathon (2025); AI Workshop participant at IIT Hyderabad
- Solved 100+ DSA problems on LeetCode; strong Java OOP fundamentals from academic coursework
- Health & Welfare (HW) Tech domain awareness — familiar with claims processing, SDLC-based testing in enterprise environments
- Languages: English, Kannada, Hindi
