

HEMANTH M

hemantham015@gmail.com — +91 6362659789 — github.com/AnuragHemanth — linkedin.com/in/anurag-hemanth9945

PROFESSIONAL SUMMARY

Aspiring Software Development Engineer with strong foundation in MERN stack (MongoDB, Express.js, React.js, Node.js) and Data Structures & Algorithms. Experienced in building full-stack web applications, RESTful APIs, and deploying scalable applications. Passionate about developing efficient, user-centric, and production-ready systems.

EDUCATION

B.E. Information Science Engineering — MIT Mysore	2022 – 2026
CGPA: 8.4/10	
Pre-University — Christ The King	2020 – 2022
Percentage: 86%	

TECHNICAL SKILLS

Languages	JavaScript, Python, Java, SQL
Frontend	React.js, HTML, CSS
Backend	Node.js, Express.js
Database	MongoDB, MySQL
Core CS	Data Structures, Algorithms, OOP, DBMS
Tools	Git, GitHub, Postman, Linux, Render

PROJECTS

Wanderlust Web Application	<i>MERN Stack, Render</i>
- Developed a full-stack travel listing platform with authentication and CRUD operations - Built RESTful APIs using Express.js for managing listings and user data - Integrated MongoDB for efficient data storage and retrieval - Deployed the application on Render, enabling live access and scalability - Implemented middleware for authentication, validation, and error handling - Designed responsive UI using React to enhance user experience	
Speech-to-Speech Translation System	<i>Python, Deep Learning</i>
- Built an end-to-end pipeline integrating ASR, machine translation, and TTS - Designed modular backend components for scalable integration - Optimized audio preprocessing pipeline for improved latency	
LSTM Stock Price Prediction	<i>TensorFlow, Keras</i>
- Developed LSTM-based time-series forecasting model - Performed data preprocessing and feature engineering - Evaluated model performance using validation datasets	

EXPERIENCE

AIML Intern — Spherenex	Feb 2026 – Present
- Built and trained machine learning models for predictive analysis - Processed structured datasets and automated preprocessing workflows - Integrated ML models into backend systems for real-time usage	

ACHIEVEMENTS

- Secured **2nd Place** — HackFusion 1.0 Hackathon (2025)
- Solved 100+ DSA problems on LeetCode and various platforms
- Attended Artificial Intelligence Workshop at IIT Hyderabad

ADDITIONAL INFORMATION

Languages	English, Kannada, Hindi
Interests	Full-Stack Development, System Design, Artificial Intelligence, Fitness Training
